

**KANDRA KSHEERAJ**

**19BCE0829**

**CSE 1004 – Network and Communication**

**SLOT: L47+L48**

**Faculty: SRIMATHI C mam**

**LAB Digital Assignment- 5**

**Lab Date: 12-05-2021**

**CONSTRUCTION OF WIRED NETWORK WITH RING TOPOLOGY USING TCL  
SCRIPT. UPLOAD THE SAME AS PDF FILE AND HEREWITH ATTACH**

One of the most popular simulator among networking researchers.

Discrete event, Packet level simulator

Events like 'received an ack packet', 'enqueued a data packet'

Network protocol stack written in C++

Tcl (Tool Command Language) used for specifying scenarios and events.

Unix Based. Runs also in windows using cygwin

Simulates both wired and wireless networks

**Installation:**

Installation of NS2 (ns-2.35) in Ubuntu 20.04 LTS

Step 1: Install the basic libraries like

```
$] sudo apt install build-essential autoconf automake libxmu-dev
```

Step 2: install gcc-4.8 and g++-4.8

open the file using sudo mode

```
$] sudo nano /etc/apt/sources.list
```

Include the following line

```
deb http://in.archive.ubuntu.com/ubuntu bionic main universe
```

```
$] sudo apt update
```

```
$] sudo apt install gcc-4.8 g++-4.8
```

### Step 3:

Unzip the ns2 packages to home folder

```
$] tar zxvf ns-allinone-2.35.tar.gz  
$] cd ns-allinone-2.35/ns-2.35
```

Modify the following make files.

~ns-2.35/Makefile.in

Change @CC@ to gcc-4.8  
change @CXX@ to g++-4.8

~nam-1.15/Makefile.in  
~xgraph-12.2/Makefile.in  
~otcl-1.14/Makefile.in

Change in all places  
@CC@ to gcc-4.8  
@CPP@ or @CXX@ to g++-4.8

open the file:  
~ns-2.35/linkstate/lis.h

Change at the Line no 137  
void eraseAll() { erase(baseMap::begin(), baseMap::end()); }

to This  
void eraseAll() { this->erase(baseMap::begin(), baseMap::end()); }

All changes made

### Step 4: Open a new terminal

```
$] cd ns-allinone-2.35/  
  
$] ./install
```

### Step 5 - Set the PATH Open a new Terminal,

\$] gedit .bashrc

Paste the following lines

```
export PATH=$PATH:/home/yourusername/ns-allinone-2.35/bin:/home/yourusername/ns-allinone-2.35/tcl8.5.10/unix:/home/yourusername/ns-allinone-2.35/tk8.5.10/unix
```

```
export LD_LIBRARY_PATH=/home/yourusername/ns-allinone-2.35/otcl-1.14:/home/yourusername/ns-allinone-2.35/lib
```

Logout and Login back

OR

\$] source .bashrc

```

```

IMPORTANT NOTICES:

- (1) You MUST put `/home/ksheeraj/ns-allinone-2.35/otcl-1.14`, `/home/ksheeraj/ns-allinone-2.35/lib`, into your `LD_LIBRARY_PATH` environment variable.  
If it complains about X libraries, add path to your X libraries into `LD_LIBRARY_PATH`.  
If you are using `csch`, you can set it like:  
`setenv LD_LIBRARY_PATH <paths>`  
If you are using `sh`, you can set it like:  
`export LD_LIBRARY_PATH=<paths>`
- (2) You MUST put `/home/ksheeraj/ns-allinone-2.35/tcl8.5.10/library` into your `TCL_LIBRARY` environmental variable. Otherwise `ns/nam` will complain during startup.

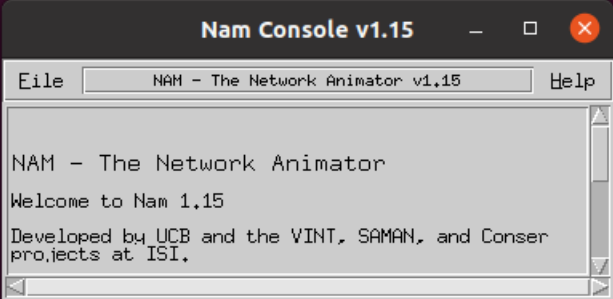

After these steps, you can now run the ns validation suite with  
`cd ns-2.35; ./validate`

For trouble shooting, please first read ns problems page  
<http://www.isi.edu/nsnam/ns/ns-problems.html>. Also search the ns mailing list archive for related posts.
